VISIONZ

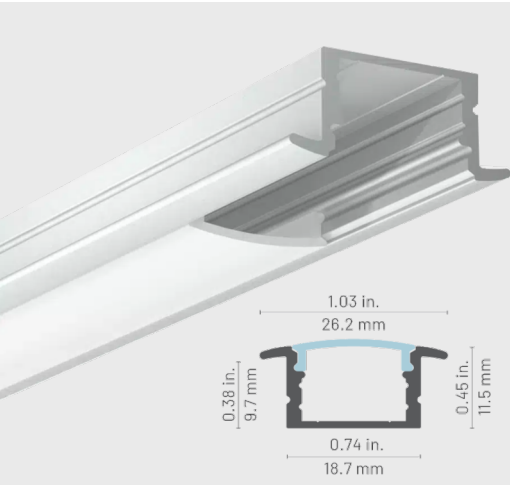

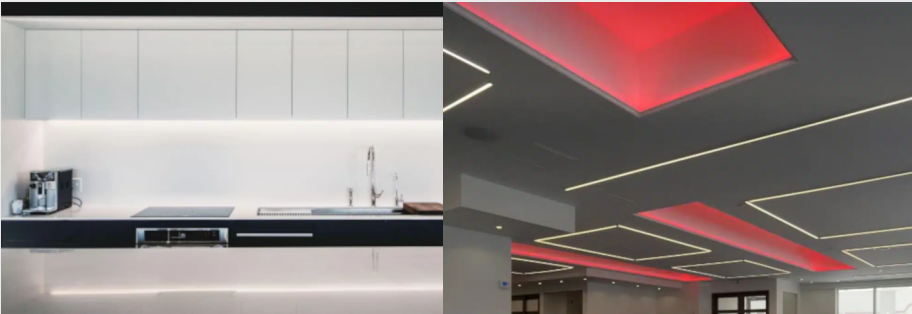

Linear Extrusions

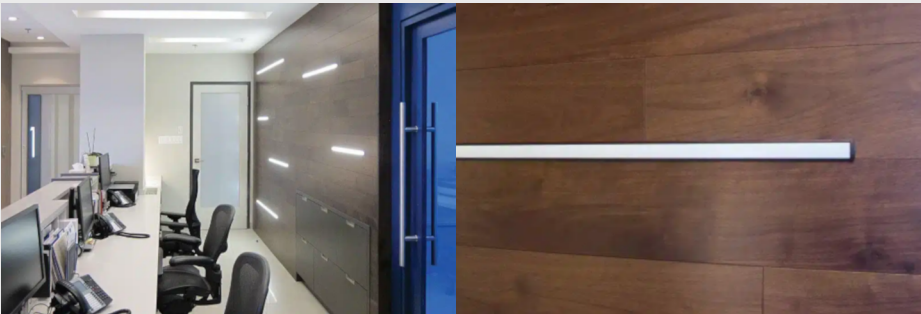

1100 Series The 1100 profile is an extra shallow channel designed to be discreet and fit in places with limited space.

1200 Series The 1200 profile is designed to meet the daily needs of linear accent lighting.

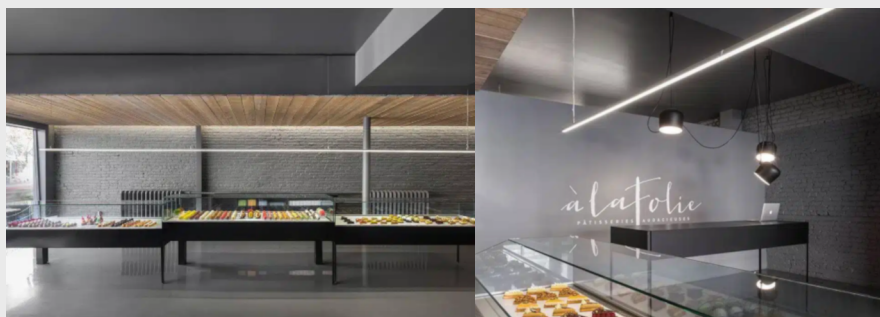

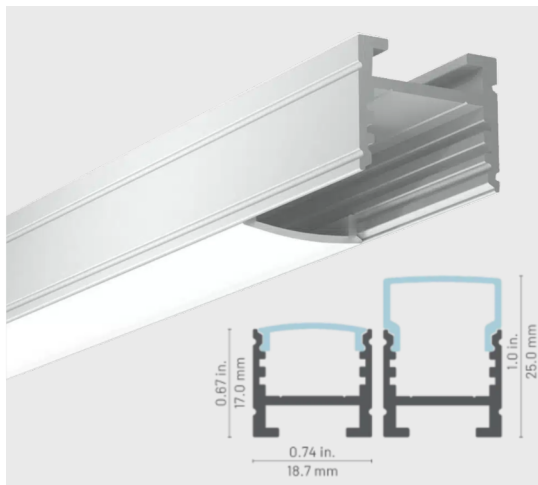

1300 Series The 1300 profile is designed for recessed linear lighting applications.

1400 Series

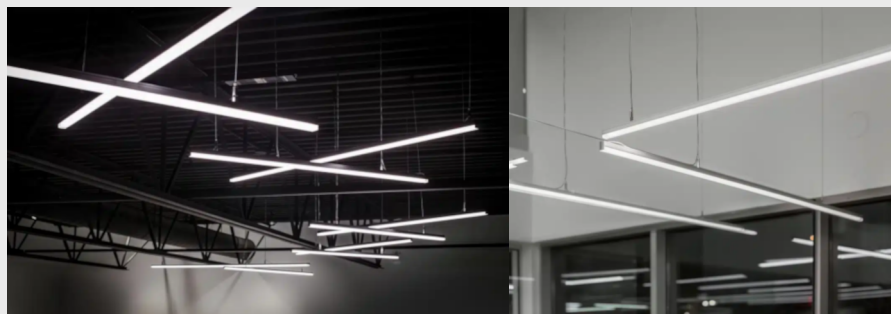

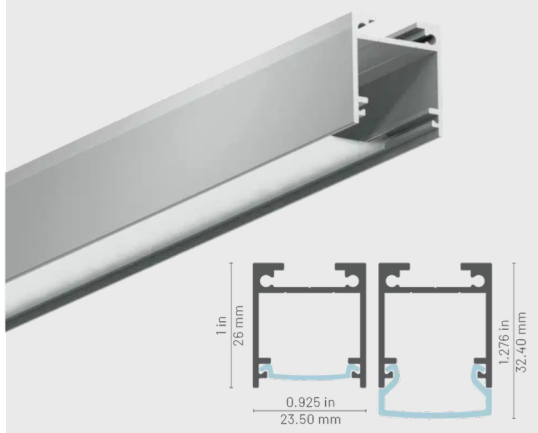

The 1400 profile is designed to be sleek and versatile through its many permutations. With a wide range of installations, select from a minimalist pendant to a surface mounted channel, or to being recessed within a flangeless drywall system.

*Optilux and Luxline available

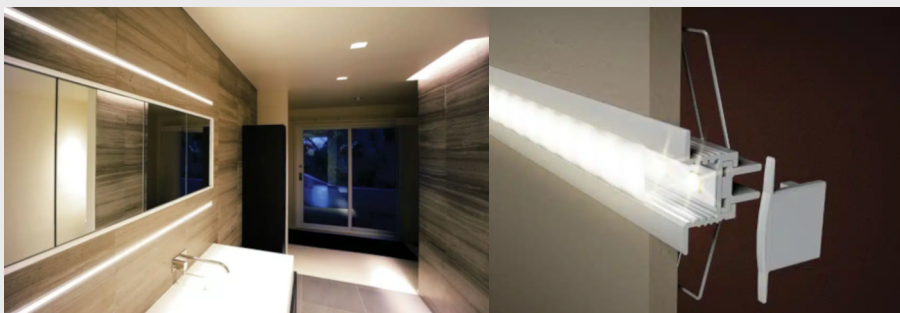

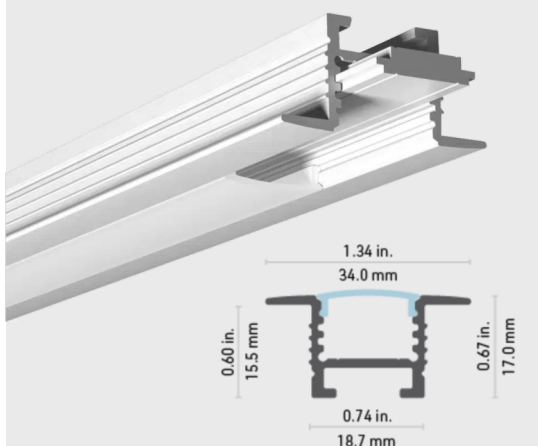

1450 Series

This profile is the biggest in size from our 1000 series line of product. It has been specially designed for outdoor use and can house all the different IP68 lumen Packages we offer.

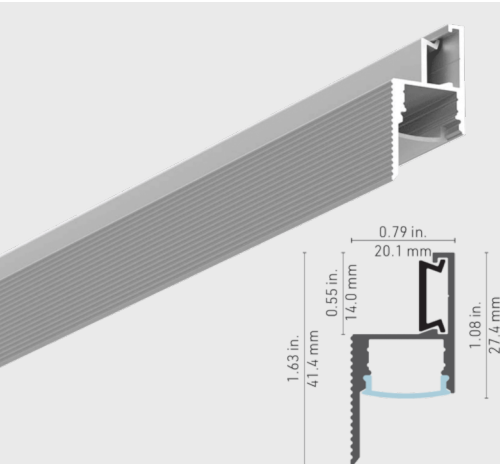

1500 Series

The 1500 profile is designed for recessed linear lighting applications.

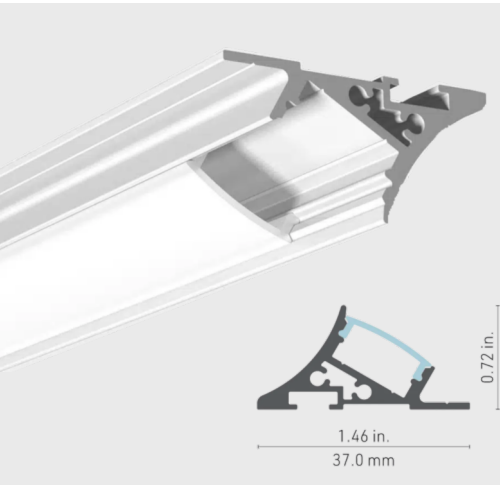

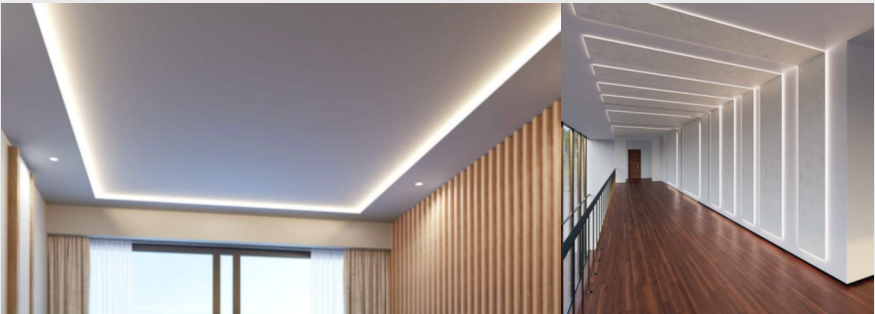

Linear Extrusions

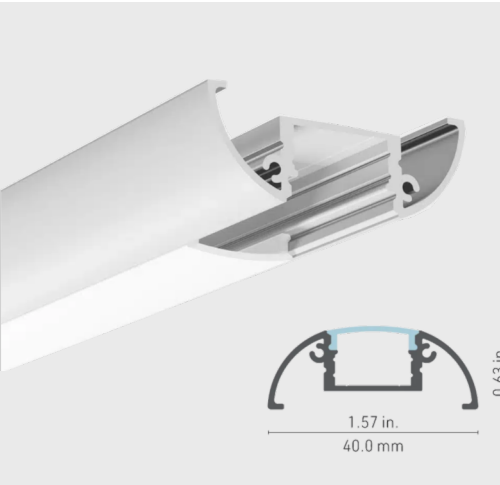

1540 Series

A cove without a cove. Go beyond the traditional idea of a 6"x6" or 9"x9" box to create a cove light. The 1540 profile allows you to create a cove detail with only a depth of 5/8 of an inch.

1650 Series

The 1650 profile is your best choice for product display. It offers lighting at a 30-degree angle, so you can cover all of the items on your shelves or racks and bring them centerstage.

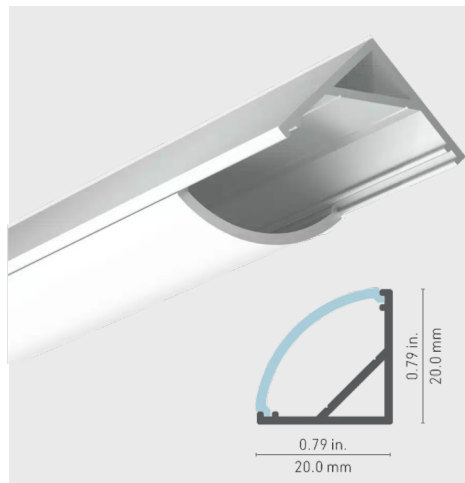

1690 Series

Great for under cabinet lighting. A rounded profile especially designed to conceal mounting hardware and wires, the 1690 can serve well for under cabinet lighting, or on any other surface as a mural fixture.

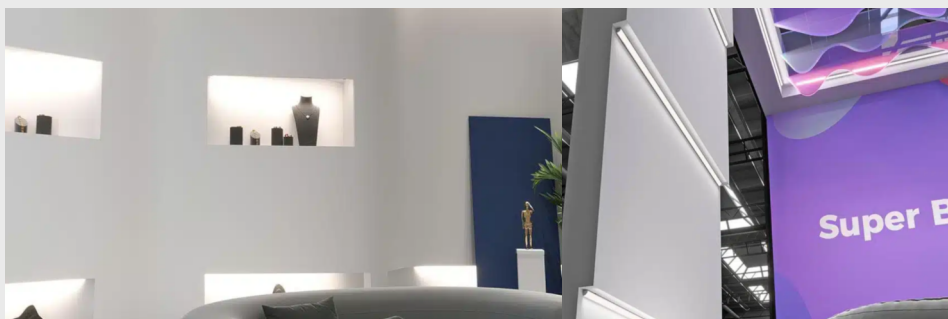

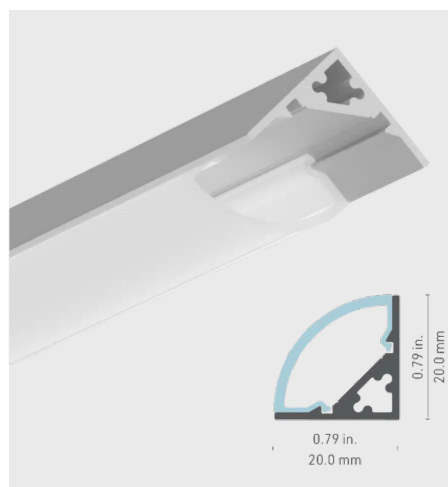

2000 Series

The 2000 is designed to allow extra lighting angles. The profile can be installed to project at 30 or 60 degrees, two angles for lighting extra deep or high scenes, to bring out the finest details, without hot spots.

2200 Series

Creating a visual impact has never been easier with our new 2200 profile. Offering lighting without hot spots at a 45-degree angle from a corner, this series excels at maximizing appeal of the products in POP stands while maintaining a minimalist style.

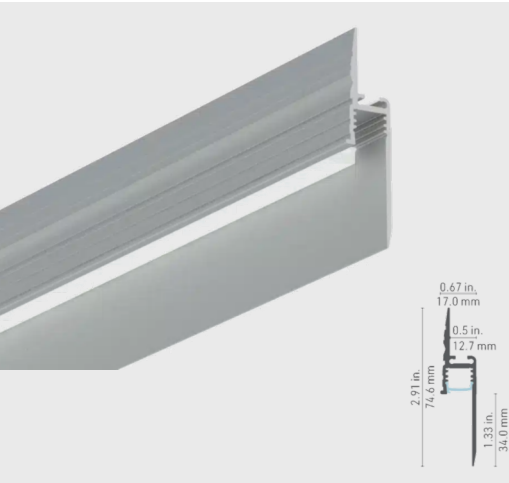

2400 Series

Offering lighting without hot spots at a 45-degree angle from a corner, this series excels at maximizing appeal of the products in POP stands, while maintaining a minimalist style. This profile includes a long lens fitting system to maximize its long term durability.

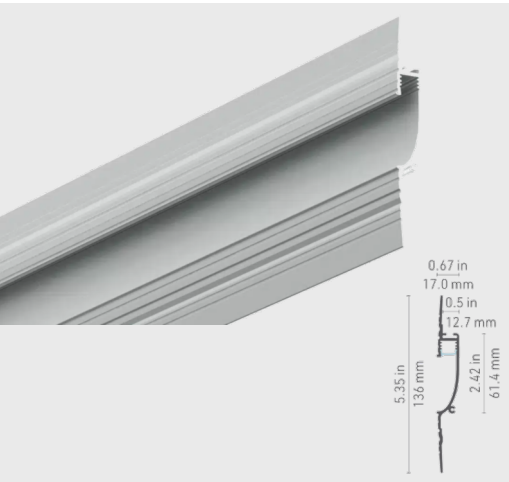

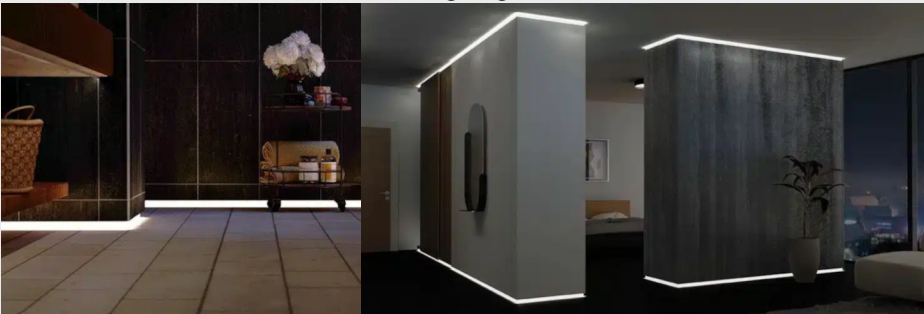

Linear Extrusions

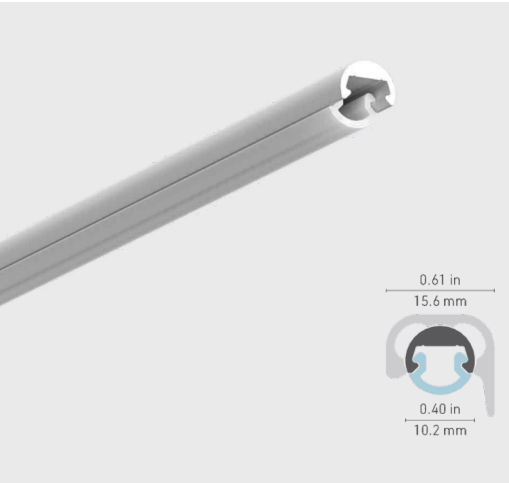

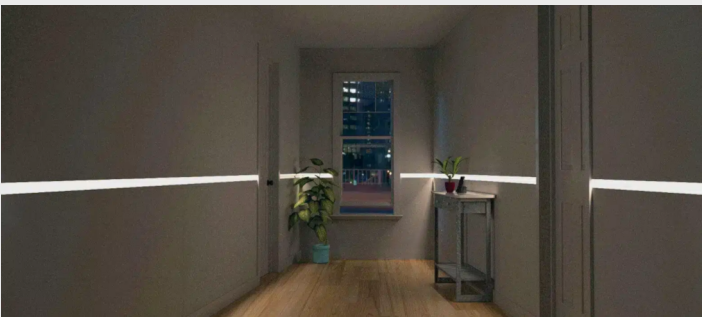

3150 Series

Contour lighting at its best! The ultimate in profiles that disappear completely into the wall surface, the 3150 is designed to provide downward lighting, 90° angle lighting. With a longer inner section than the 3100, this profile provides a greater surface area for light reflection, which optimizes safety applications in areas with poor or deficient lighting.

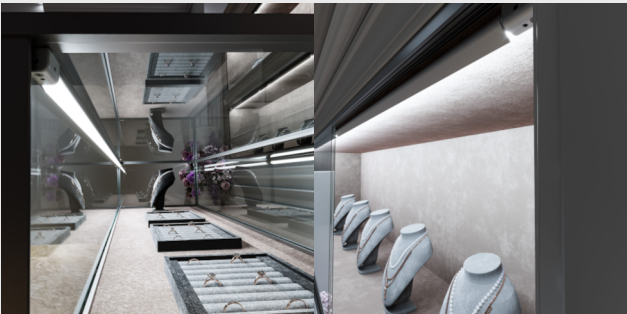

3200 Series

With its smooth and curved inner surface, the new 3200 recessed profile allows indirect lighting with a hollow effect, regardless of the height at which it is installed. What's new? The possibility of adding endcaps for a neat and elegant finish. The 3200 is ideal for residential or commercial applications that require high efficiency, safe lighting.

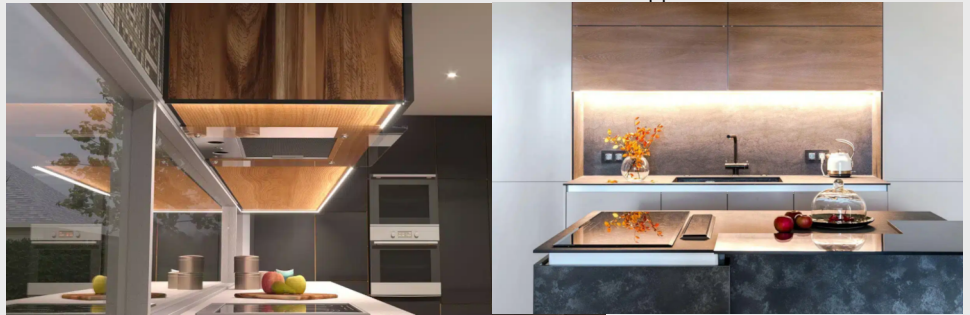

4100 Series

A retail lighting solution for perfectly lit display cases. The compact 4100 profile helps you focus light where it is most needed. On the products! Ideal for highlighting jewelry cases and other prized possessions.

4200 Series

Our range of ultra-compact profiles has been expanded! The 4200 profile provides accent lighting at an angle of 30° to highlight products on shelves or to cut out the underside of cabinets. A notch on the underside completely conceals the TR64 mounting wire, giving the luminaire an even more aesthetic look. Ideal for commercial or residential applications.

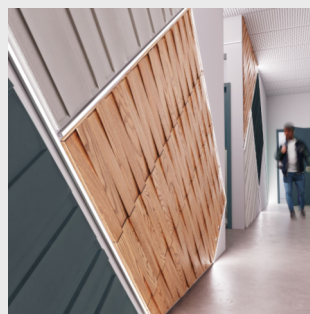

4400 Series

One of the smallest on the market, guaranteed to be discreet! The 4400 profile is reduced to a minimum with its size of less than half an inch, while accepting a good range of LED strips1 . (1) Accepts LED strips up to 8mm wide.

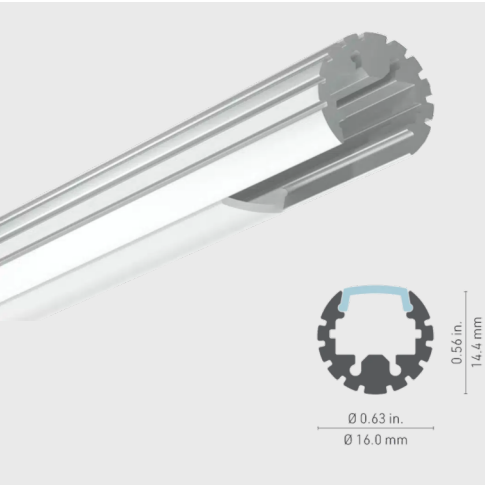

4450 Series

An extremely small aluminum channel that gives you a linear pin of light to create a beautiful modern look. The extra slim channel can be recessed or surface mounted for the desired effect. This profile is easily installed with a specially designed bracket that snaps into place.

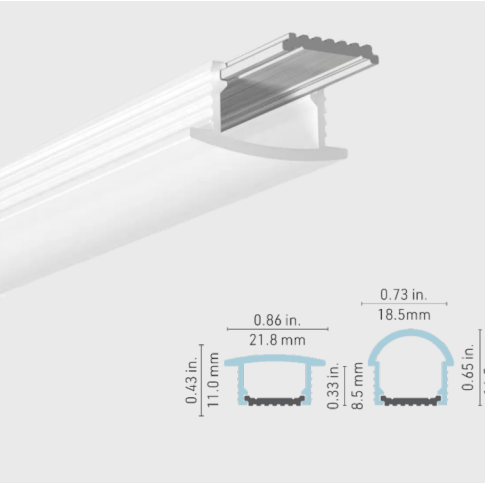

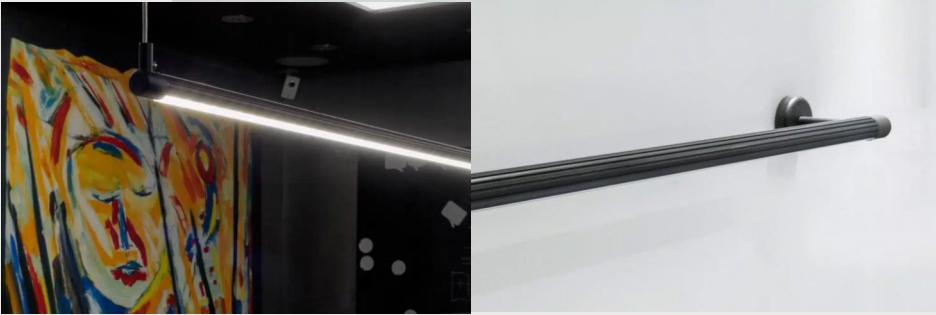

Linear Extrusions

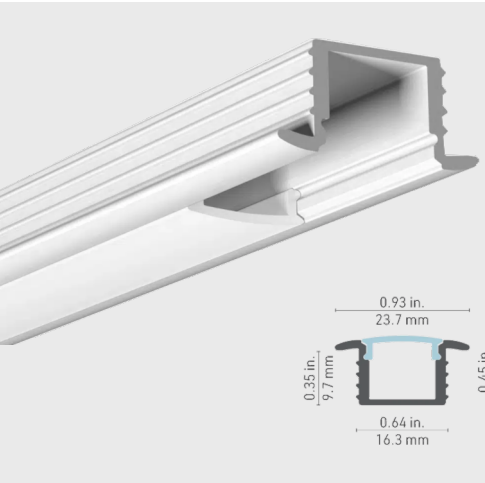

4500 Series

A well cherished secret that we just have to brag about. Meet our magic wand! The 4500 is a slim but extremely versatile display solution. With its ultra-compact size and its complete freedom of lighting direction, and accepting most LED strips, you will find many ways to install it with its wide variety of accessories.

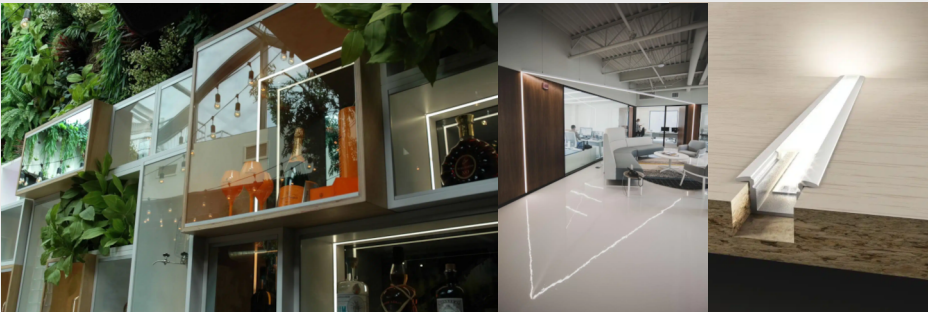

5100 Series

The 5100 consists of an aluminum heatsink base inserted into a flexible recessed lens with gripping sides. It allows for a very simple installation, with the assembly inserted into the recess and staying in place due to the gripping ribbed lens sides.

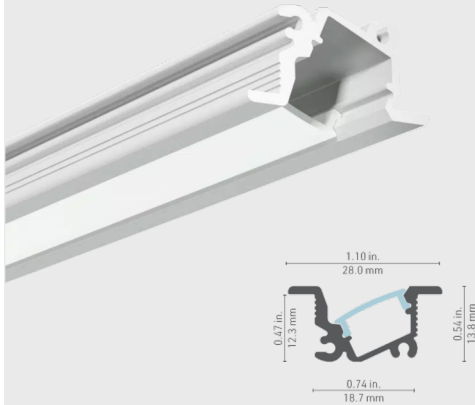

5350 Series

Here is a compact recessed profile allowing you to make the light source and the LED invisible. The edges on each side of this extrusion allow a recessed installation, giving it style with a discreet and neat appearance.

5450 Series

The 5450 is a compact recessed LED lighting profile for cabinetry and other wood furnishing projects, directing the light beam at a 25-degree angle from the normal, which allows you to light the cabinet contents from the edge.

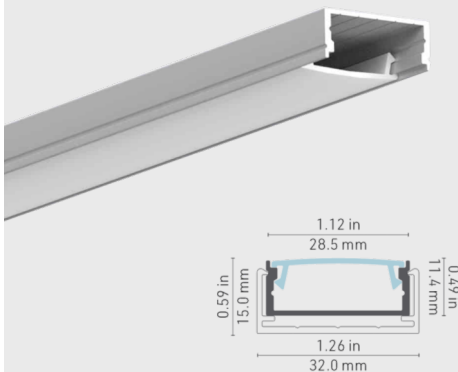

5560 Series

The 5560 profile allows integrating linear LED lighting on curved or uneven surfaces. Its low profile (1/5" including lens), and a thickness of less than 1/32" (0.75mm), allows for effortless bending and installation using plain mounting tape or screws..

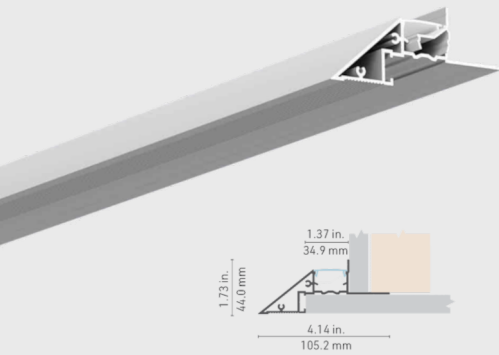

6100 Series

A slim profile for maximum light output. The 6100 takes up to two strips of LED tape delivering up to 1000 lumens per foot. This compact and versatile luminaire is ideal for larger alcoves and surface mounted installations.

Linear Extrusions

*available in LuxLine

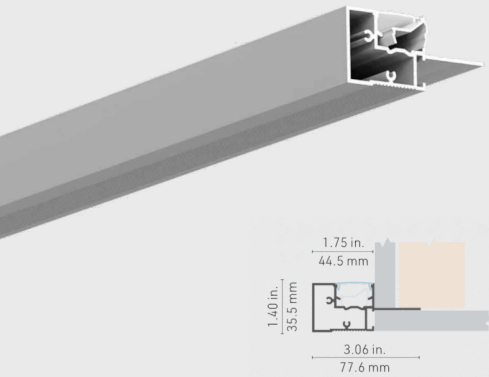

6900 Series

The 6900 "Pen Knife" profile is named for being a smaller version of our 8920 Knife Edge and is designed for cove lighting. The aluminum channel directly fits standard gypsum panels for a seamless finish to simplify the construction of the cove detail.

*available in LuxLine

6950 Series

The 6950 "Bulk Edge" profile is named for its blunt blocklike side and is designed for cove lighting. The aluminum channel directly fits standard gypsum panels for a seamless finish to simplify the construction of the cove detail.

7850 Series

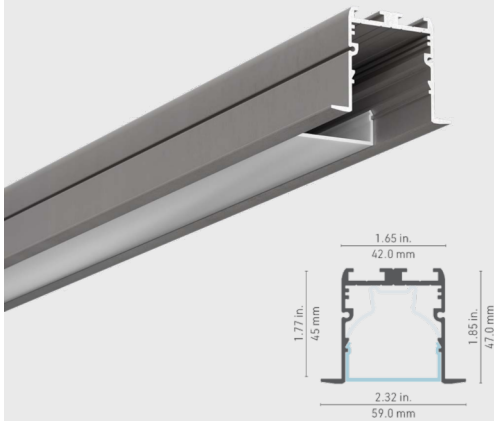

The 7850 profile is designed as an illuminated standard closet rod for an added layer of light within high-end closets and wardrobes.

*available in LuxLine

8510 Series

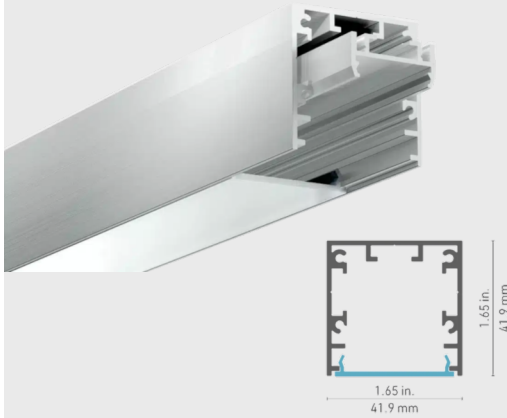

The 8510 is a recessed linear channel made from aluminum. It is integrated with a wide array of 24-volt energy-efficient LED options for a custom recessed linear lighting solution. With elegant and discreet edges, the 8510 fits perfectly into a wall or ceiling without the need for plastering.

*available in LuxLine and Optilux

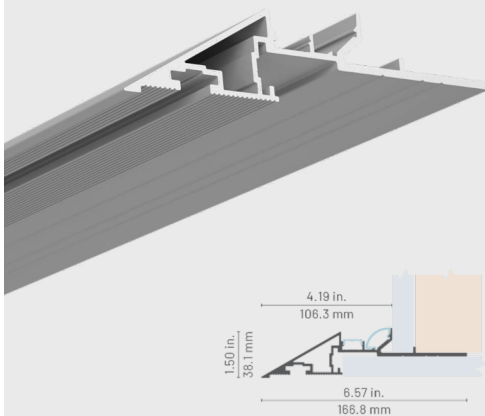

8800 Series

The 8800 is an aluminum channel designed to provide a bold linear line of light. This aluminum channel can be suspended, surface mounted, or recessed permitting a vast number of applications with this linear lighting solution.

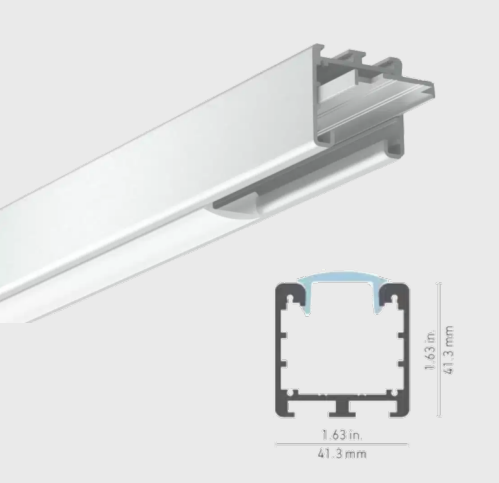

8920 Series

The 8920 "Knife Edge" profile is designed for cove lighting. The aluminum channel directly fits standard gypsum panels for a seamless finish and to simplify the construction of cove lighting. Two integrated LED channels add contour lighting upward and outward to beautifully fill the space with light.

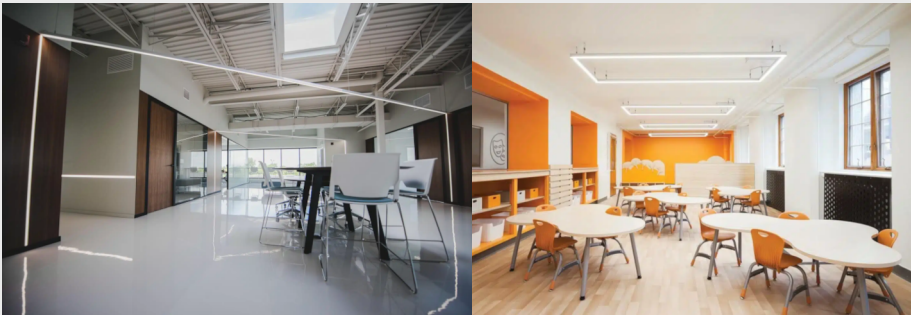

Linear Extrusions

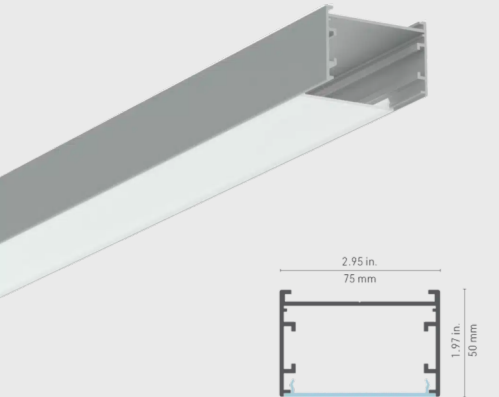

9400 Series

The 9400 profile has twin mounting channels, for a wide range of installation options. Whether on swivel arms, on a surface, or suspended, it can be built in complex spatial configurations using corner joiners. Its rugged build in 6063-T5 aluminum alloy will withstand abuse in demanding applications and extreme weather, all of it with an understated elegance.

*available in LuxLine

9820 Series

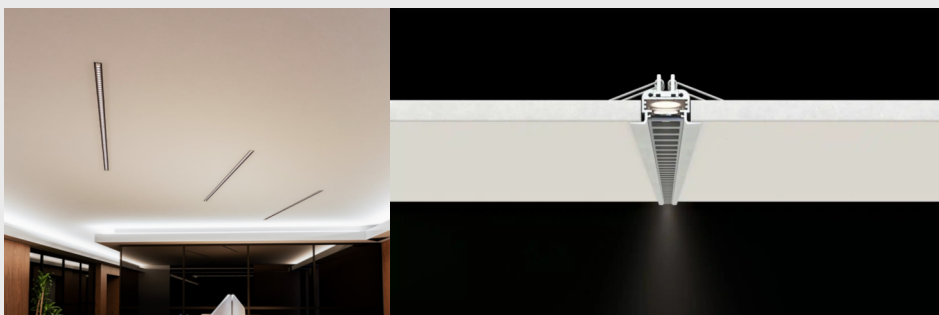

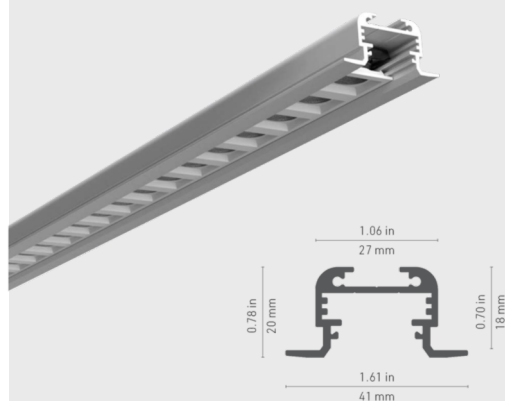

The 9820 is a 9000 series system designed for those looking for a minimalist effect. Its ultra-slim profile combined with our advanced LED technology make it a suitable solution to accentuate the geometric shapes of stairs, hallways, kitchen islands and much more.

*Optilux

1580 Pro

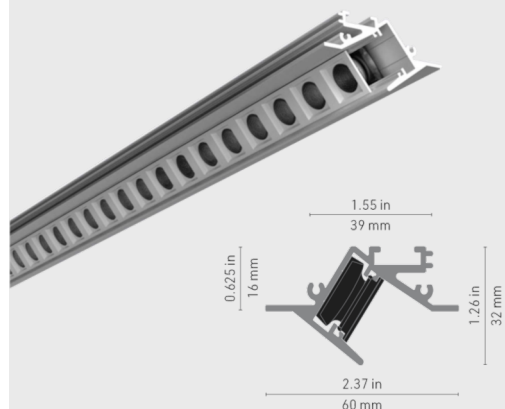

The edge design of the 1580 Optilux Pro profile harmonizes with your décor and allows for a very secure recessed installation. Use with our spring brackets for a fast and easy installation.

*Optilux

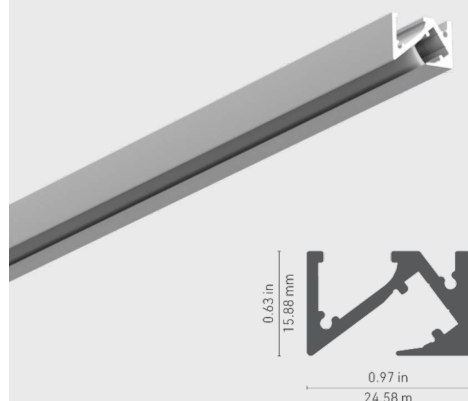

1590 Pro

The 1590 Optilux Pro offers a direct and powerful light allowing you to focus the light wherever you want it. It can be focused on a work surface, to enhance textures or to achieve an indirect lighting with a wall-washing effect.

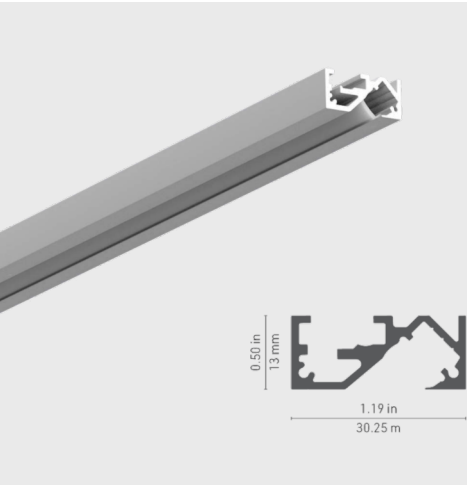

4250 Pro

A new compact profile has been added to this thin series! Profile 4250 provides accent lighting at an angle of 53° to highlight products on shelves or to cut out the underside of cabinets.

Linear Extrusions

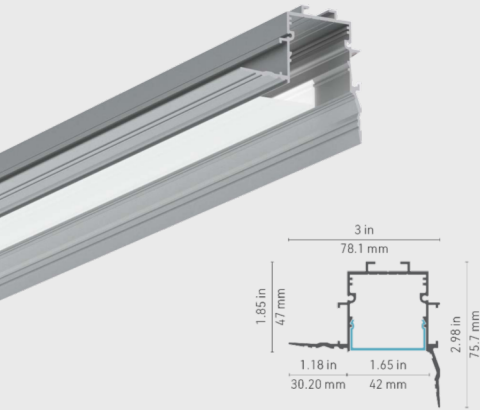

4260 Pro

A new compact profile has been added to this thin series! Profile 4260 provides accent lighting at an angle of 53° to highlight products on shelves or to cut out the underside of cabinets.

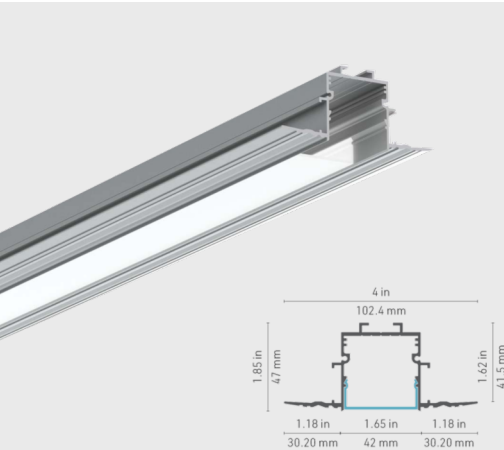

*available in LuxLine

8540 Pro

The 8540 Pro profile is designed to disappear into the structure, merging the light source with the surface. Its 90° edge on one side makes it ideal for contour lighting application.

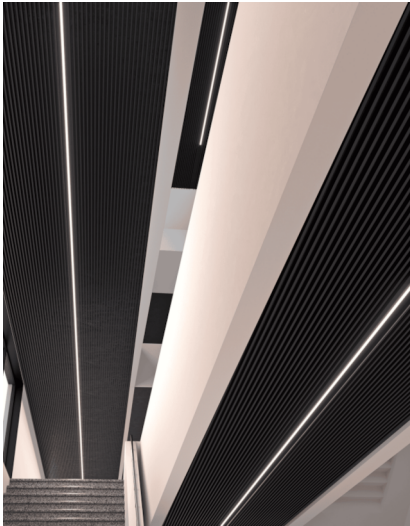

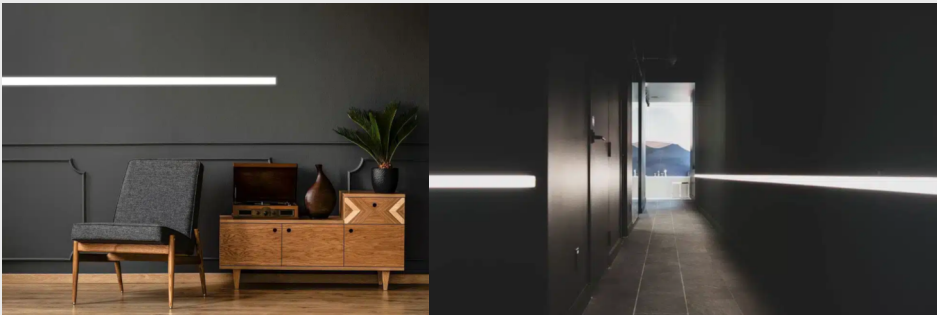

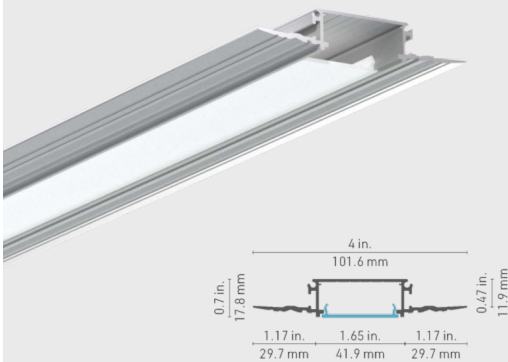

8550 Pro

The 8550 Pro profile is designed to disappear into the structure, merging the light source with the surface.

8870 Pro

The 8870 Pro profile is designed to disappear into the structure so that the light source merges with the surface.
