

KOOIJ

About Kooij

Kooij was founded in 2009 by Dirk van der Kooij in Eindhoven, in the Netherlands. Utilizing many recycled products such as Discarded CDs, leather sofas, kitchen appliances, chocolate moulds, and diseased wood to create fixtures with rich textural and structural fodder. Following a specific process that allows each fixture to be uniquely formed by the use of in-house-developed presses, robots, and extruders to shape the distinctive identity of the Kooij collection. Truly bespoke in nature, each fixture is classified as one of a kind!
