## About Light Glass

Founded in 2012 in Philadelphia, Lightglass's mission was to transform windowless spaces and bring the daylight experience into them. Designed with the client in mind, Lightglass harvests the natural element of daylight through the use of LEDs. Ideal for hospitals, offices and schools, where people spend hours a day, Lightglass's goal is to improve the quality of people's lives by bringing the day

lighting experience to light-deprived spaces. We've designed it to be fully customizable, keeping you in mind every step of the way. Let's bring some light into your dark spaces!
