Visionz Of The Outdoor

Nearly 25 years in the design and construction industries has culminated into a group of companies focused on the design and specification community. The team at **Visionz** lays great focus on '*Brining Concepts To Light*'. At the core, you will find interior and exterior, architectural lighting fittings and components, an area of design which complements the landscape furnishings division.

Site Furnishings are key elements in the design of any exterior environment. **Visionz** of the outdoor space, with the use of innovative and yet functional pieces, will assist in enhancing your exterior specifications, thus '*Brining Concepts To Light*'.

Through supporting the specification community and education of the product distributors, we aim to continue the evolution of design.
